github.com/Seohyeon-Min |
seohyeon-min.github.io/my_portfolio

Producer and project lead who turns creative direction into organized, completed work. I define scope, align multidisciplinary contributors, secure resources and approvals, track execution, resolve delivery risks, and carry projects through review, on-site operation, exhibition, and closeout - supported by enough technical depth to communicate clearly with engineers and artists.

SELECTED EXPERIENCE

DANGLING GAME JAM

FOUNDER / PRODUCER / PROJECT LEAD | 2025

- Founded and delivered the university's first interdepartmental game jam: 24 participants, 6 teams, and a 36-hour production window; every team completed and submitted a playable game.
- Owned the event from proposal through closeout, including university approvals, an approximately KRW 800,000 budget, promotion, participant communication, on-site operations, final submissions, and visual materials.
- Achieved a 4.87/5 participant satisfaction score across 23 post-event responses while coordinating students across five departments and keeping all six teams on track to finish.

NEW MANZO

PRODUCTION LEAD / TECHNICAL CONTRIBUTOR | 2025-PRESENT

- Lead long-term scope, ownership, milestones, cross-discipline communication, and delivery planning for an in-development Unity rhythm-adventure project.
- Resolve production uncertainty through hands-on technical support and implementation; repository lead contributor with 417 commits.

TOO HOT!

TECHNICAL / CREATIVE PRODUCER | 2026

- Directed two gameplay programmers and coordinated delivery across gameplay, art, UI, VFX, audio, and presentation using a 130+ item P0-P3 backlog.
- Assigned owners, documented acceptance details in Notion, reviewed behavior and code, requested revisions, merged work, tested the build, and completed final visual integration.
- Turned design risks into concrete system requirements and player-feedback decisions; secured an offline booth at a Korean game event for an October 2026 exhibition.

ADDITIONAL EVIDENCE

STREET TYPER - Scoped and coordinated a public 10-day team build, published it on itch.io, and support its preparation for Steam release while owning visual direction, UI, VFX, and gameplay readability.

MANZO - Bridged design, art, and engineering while directly implementing rhythm, rendering, particles, debugging, Git integration, and final presentation; 366 commits.

DOUBLE HIT / BIRD STRIKE - Led small C++ projects while directly implementing engine/gameplay systems and producing art and audio.

SKILLS

Production	Scope/milestone planning, P0-P3 prioritization, ownership, risk identification, acceptance criteria, review, testing, integration
Planning Tools	Notion, GitHub Projects, GitHub Issues; task documentation, status tracking, review and rework loops
Technical	Unity, C++, C#, OpenGL, GLSL, ShaderLab, Git branching and merge review, CMake; graphics/gameplay debugging

EDUCATION

B.S. Computer Science in Real-Time Interactive Simulation | 2026-Present | Expected Graduation: May 2028
Keimyung University / DigiPen Institute of Technology | GPA 3.958/4.0
