

MIN SEOHYEON

GAME DEVELOPER | PROGRAMMING · TECHNICAL ART · ART · PRODUCTION

weare1842@gmail.com | github.com/Seohyeon-Min | Portfolio: seohyeon-min.github.io/my_portfolio

Game developer who connects gameplay code, shaders, original 2D art, UI/VFX, and team delivery. Built custom C++ engines and Unity games, shipped a 10-day playable project, and organized a 36-hour game jam. Comfortable owning implementation, debugging, visual polish, and production coordination.

SKILLS

Programming: C++, C#, Python, JavaScript; Unity / URP, OpenGL / GLSL, HLSL / ShaderLab; gameplay, procedural systems, rendering, collision and lifetime debugging. Unreal Engine: basic Cascade / Niagara VFX setup.

Art & delivery: 2D art, UI composition, particles, animation, shader integration; Clip Studio Paint, Spriter Pro, RenderDoc, Git, GitHub Projects / Issues, Notion, CMake; scope, task priorities, reviews and merges.

GAME DEVELOPMENT & TEAM DELIVERY

TOO HOT!

Jul 2026

Project Lead / Technical Art / Visual Integration | Unity · ShaderLab

- Created the 2D shadow treatment, pattern-specific VFX, UI, animation and hit feedback; tuned visual hierarchy and shadow controls for readable combat.
- Directed two programmers through a 130+ item P0-P3 backlog; specified stage data flow, save safeguards and debug controls, reviewed teammate-authored gameplay code, and managed merges and final visual integration.

STREET TYPER

Aug 2026 | 10-day build

Producer / Original Art / UI Technical Art | Unity URP · C# · ShaderLab

- Scoped and coordinated a bilingual typing-combat game; created original 2D art, UI, particles, outlines, camera shake and animated hit feedback. Published on itch.io and prepared for Steam release.
- Specified, evaluated, debugged and integrated an AI-assisted reusable UI shader workflow with gradients, rounded forms, shadows, blur and Inspector presets; gameplay code was teammate-authored.

MANZO

Sep 2024 - Dec 2025

Production Lead / Graphics & Engine Programmer | C++ · OpenGL · GLSL

- Built a custom renderer, layer-sorted draw queues, framebuffer post-processing (bloom, distortion, god rays, ripples), reusable particles, BPM timing and audio-synchronized movement / boss patterns.
- Fixed severe frame drops from redundant collision checks and dangling-pointer failures through engine-level ownership changes; coordinated integration and final polish. Largest repository contributor: 366 commits.

NEW MANZO

Aug 2025 - Sep 2026

Production Lead / Primary C# Programmer / Game Artist | Unity · C#

- Led scope, milestones and cross-discipline delivery while implementing fish schooling, obstacle avoidance, beat-linked hunting, raycasting and post-processing. Repository lead contributor: 417 of 585 commits.

WAVE SIMULATOR

Sep 2026

Technical Art / Shader Development | Unity URP · HLSL · C#

- Built procedural water with animated noise, vertex displacement and layered surface shading; exposed reusable wave / halfpipe geometry controls in C# and produced a playable WebGL build.

DOUBLE HIT - C++ texture / sprite management, collision, GameObject / GameComponent architecture and shared engine services.

BIRD STRIKE - Audio-timeline beat detection, rhythm-synchronized spawning, attack subdivision and movement; original art and audio in a custom engine.

THINK THINK - Game design, art and project production. **EDGE DRIVE** - Placed and adjusted existing Unreal VFX assets with basic Cascade / Niagara modifications.

COMMUNITY, TEACHING & INDEPENDENT PRODUCTION

DANGLING GAME JAM | Founder / Producer | Jun 2025 - Delivered the university's first interdepartmental game jam: 24 participants, 6 teams, 36 hours; every team finished. Managed approvals, ~KRW 800,000 budget and on-site operations; satisfaction 4.87/5 from 23 responses.

TEACHING ASSISTANT | DigiPen Korea | Spring 2025 - Supported ~30 Game Development Project I students with C++ implementation, debugging and actionable feedback on team projects.

PLUSH PRODUCTION | Independent Designer / Vendor & Fulfillment Lead - Generated ~KRW 10 million in revenue; managed paid preorders, manufacturer sourcing / negotiation, sample review, inspection and delivery.

JOINT BAND PERFORMANCE | Co-Organizer | May 2025 - Coordinated a two-hour show with six acts, including rehearsals, setlists, equipment, show order and post-event logistics.

EDUCATION

B.S. Computer Science in Real-Time Interactive Simulation | Expected May 2028

Keimyung University / DigiPen Institute of Technology | GPA 3.958/4.0
