

MIN SEOHYEON

TECHNICAL ARTIST | GRAPHICS PROGRAMMER

weare1842@gmail.com
github.com/Seohyeon-Min |
seohyeon-min.github.io/my_portfolio
linkedin.com/in/seohyeon-min

Technical artist and graphics programmer who works across code, shaders, VFX, UI, and art integration. I directly build C++/OpenGL engine features and Unity visual systems, diagnose rendering and gameplay failures, and translate visual goals into testable technical requirements without obscuring authorship boundaries.

SKILLS

Graphics	OpenGL, GLSL, Unity URP, ShaderLab, Unreal Engine (Niagara particle systems, project exposure), framebuffer/post-processing, custom shadows, particles, VFX, UI shaders
Programming	C++, C#, C, Python, JavaScript; gameplay and engine architecture, collision, debugging, memory/lifetime fixes
Workflow	Git branching and merge review, GitHub Projects/Issues, Notion, CMake, Visual Studio, WSL, profiling, technical specification

EXPERIENCE

TEACHING ASSISTANT - GAME DEVELOPMENT PROJECT I

Spring 2025

- Supported ~30 students across DigiPen Korea's Game Development Project I cohort with C++ implementation, debugging, and technical problem-solving throughout the term.
- Diagnosed issues across student projects and delivered clear, actionable technical feedback to help teams identify problems and improve their implementations.

MANZO 🏆

Sep 2024 – Dec 2025

Graphics / Engine Programmer · Technical Artist · Production Lead · C++ / OpenGL / GLSL

- Implemented BPM timing windows, beat/bar counting, and audio-synchronized player movement and boss patterns.
- Built layer-sorted draw queues and a framebuffer post-processing pipeline for bloom, underwater distortion, god rays, and transitions.
- Diagnosed severe boss-fight frame drops to per-frame redundant collision checks and eliminated them, restoring stable performance.
- Eliminated dangling-pointer failures by moving scenario/dialogue ownership into engine-level systems. Largest repository contributor: 366 commits.

TOO HOT! 🏆

Jul 2026

Technical Art · Creative / Technical Direction · Producer · Unity / ShaderLab / VFX / UI

- Created and integrated the game's 2D shadow treatment, pattern-specific VFX, UI, animation, and hit feedback.
- Tuned width and length controls for readable shadows across characters and combat spaces.
- Balanced direct art/technical-art execution with a 130+ item P0-P3 backlog and two-programmer coordination.
- Reviewed and tested teammate-authored gameplay implementations through final visual integration.

STREET TYPER 🏆

Aug 2026

Art · Technical Art · Producer (Team Project) · Unity URP / UI Technical Art

- Owned original 2D art, UI composition, particles, outlines, camera shake, and animated feedback.
- Specified and integrated an AI-assisted reusable UI shader workflow for rounded forms, gradients, and blur.
- Debugged and iterated the shader workflow's presets and inspector controls; gameplay code was teammate-authored.
- Published a playable build on itch.io and prepared the game for a Steam release.

DOUBLE HIT 🏆

Mar – Jul 2024

Systems Programmer · Art / Audio · Production Lead · C++ / raylib

- Implemented a custom sprite-file parser loading textures, animation frames, hotspots, and collision shapes from data.
- Built the texture manager with filename-based caching, dedup, and an offscreen render-texture mode.
- Built the GameObjectManager driving per-frame update/draw and collision dispatch across all live objects.

BIRD STRIKE 🏆

Nov – Dec 2023

Gameplay Programmer · Game Designer · Artist · Production Lead

- Implemented audio-timeline beat detection and rhythm-synchronized crow spawning as the core gameplay loop.
- Built dynamic attack subdivision, player/crow movement, and atan2-based direction logic in a custom engine.
- Produced original art and audio as sole developer on a two-month project without a commercial engine.

NEW MANZO 🏆

Aug 2025 – Sep 2026

Primary C# Programmer · Game Artist / Visual Director · Production Lead · Unity / C#

- Built raycasting-based underwater visibility and post-processing for atmospheric rendering.
- Implemented procedural leg animation for a multi-legged boss using ground raycasts and step-arc motion.
- Contributed fish-schooling AI and beat-linked hunting; repository lead contributor with 417 commits.

EDUCATION

B.S. Computer Science in Real-Time Interactive Simulation | Expected Graduation: May 2028
Keimyung University / DigiPen Institute of Technology | GPA 3.958/4.0
